GROW

ORAL STRIP PEPTIDES

DIETARY SUPPLEMENT | 30 ORAL STRIPS | STRAWBERRY WATERMELON

SUPPLEMENT FACTSServing Size: 1 (One) oral strip
Servings per Container: 30

Amount per serving	% Daily Value
Ipamorelin 250mcg	*
CJC-1295 250mcg	*

* Daily Value not established

What is CJC-1295 and Ipamorelin?**CJC-1295**

- **Type:** growth hormone-releasing hormone (GHRH) analog
- **Function:** Stimulates the pituitary gland to produce more growth hormone (GH)
- **Form:** Often available as injectable or oral dissolving film (ODF) formats
- **Half-Life:** Long-acting version (DAC) can last up to a week

Ipamorelin

- **Type:** a growth hormone secretagogue (GHS)
- **Function:** Stimulates the pituitary gland to release growth hormone naturally
- **Form:** Injectable or oral dissolving film

MECHANISM OF ACTION

- CJC-1295: Binds to GHRH receptors in the pituitary gland → triggers increased growth hormone (GH) release
- Ipamorelin: Binds to ghrelin receptors → stimulates GH release without significantly affecting cortisol or prolactin levels
- Result: Safer, targeted GH release, supporting metabolism, muscle growth, recovery, and longevity

BENEFITS

- Increased lean muscle mass
- Fat loss and improved body composition
- Faster recovery from injuries
- Enhanced energy, stamina, and vitality
- Anti-aging support (skin elasticity, sleep quality, tissue repair)
- Better sleep due to natural GH cycle enhancement
